Pick, Pack, and Ship!

MAS90 now has **PACKING LISTS!**

If your company can benefit from custom packing lists, you will want to learn more about MAS90's new **Pick, Pack and Ship** enhancement (as of version 3.60).

MAS90 now comes **standard** with a shipping enhancement that enables warehouse users to create packing lists by complete shipment as well as additional packing lists for individual packages.

New features also include a Shipping History Report and a Shipping Exception Report, which allows managers to see which orders have shipped, and which exceptions have been made to those shipments.

Date entry is not duplicated. When the warehouse processes a packing list, MAS90 automatically creates the invoice at the same time. Invoices are created in Sales Order Invoice Data Entry, and can be printed by the warehouse staff or by accounting, depending upon the access you assign.

To learn more about packing lists, give us a call and we can demo the process over the Internet.
